Specifically, the Company will make a comprehensive judgment targeting a total return ratio(*) of around 30-35%, while considering medium/long-term investment amounts, etc. for raising corporate value into the future, based on an amount of shareholder returns that combines the amount of dividends and treasury shares acquired.

(*) Total return ratio = (Dividends + Treasury shares acquired) / Consolidated net income * 100

Regarding year-end dividends for the year ended March 31, 2015, the Company has resolved to pay a per-share dividend of ¥18 (previous forecast was ¥15) in consideration of consolidated results, the total return ratio and other factors. Interim dividends of ¥15 have already been paid out, as of December 1, 2014, which will bring annual dividends to ¥33 per share.
